Step 2: Download and Install Gurobi

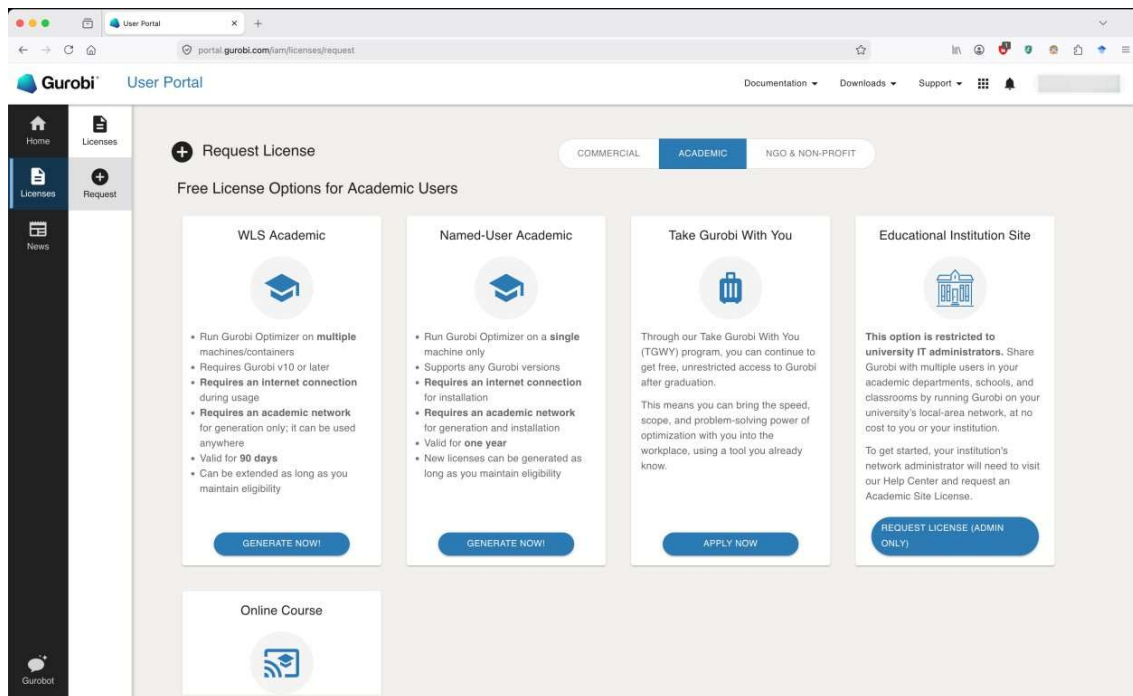

1. After logging in to your gurobi account go to ,
<https://www.gurobi.com/product/download-center/optimizer-software>
2. Note that this can only be accessed while you are logged in to your account on the Gurobi website.
3. Download the correct installer for your operating system:
 - Windows
 - macOS
 - Linux

4. Install Gurobi using the default settings.

Step 3: Request the Academic License

1. Log in to your Gurobi account.
2. Open the user portal: [Gurobi User Portal](#)
3. Go to:
 - o **Licenses**
 - o **Request**
4. Choose:
 - o **Named-User Academic** license
5. Click **Generate Now**.

Step 4: Activate the License

After generating the license, Gurobi will show a command like:

```
grbgetkey xxxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxxxx
```

Run this command in:

- Terminal (macOS/Linux)
- Command Prompt (Windows)

This downloads and installs the license automatically.

Step 5: Test Installation

Run Python. Install `gurobipy` and test:

Run the input file:

`test.py`

If no error appears, the installation is successful.

Step 6: Install gurobipy in VS Code

Run the following in the VS Code terminal:

```
pip install gurobipy
```

Important Notes

- You must be connected to the institute network while requesting the license.
- The free academic license is valid for non-commercial academic use only.
- The license is usually valid for 1 year.
- Each participant should create their own account and license.
